

Shivanshu Shukla

Software Engineer | Full Stack | AI | Cloud

Experienced in building AI-powered applications, scalable full-stack platforms, REST APIs, RAG systems, workflow automation, and cloud-native applications using Next.js, Node.js, FastAPI, AWS, and LLM APIs.

EDUCATION

Guru Gobind Singh Indraprastha University (GGSIPU)

B.Tech in Computer Science — CGPA: 8.6/10

New Delhi, India

2020 – 2024

EXPERIENCE

Binary Geckos

Full Stack Developer

Apr 2026 – Present

Remote

- Developed and maintained **30+ production-ready websites** for multiple **telehealth and healthcare brands** using **React.js**, delivering responsive, SEO-friendly, and high-performance user experiences.
- Built complete customer-facing platforms including **landing pages, member portals, checkout flows, and admin interfaces**, implementing end-to-end functionality based on client requirements and business workflows.
- Integrated **Stripe Payment Gateway, GA4 analytics, webhooks**, and third-party APIs to enable secure payments, user tracking, marketing automation, and seamless platform integrations.
- Implemented **PAP (Post Affiliate Pro)** tracking scripts for affiliate marketing, collaborated closely with clients to deliver feature enhancements, bug fixes, and production-ready solutions across multiple brands.

Arora Innovation LLC (Cosmiron)

Full Stack Developer

Dec 2025 – Mar 2026

Remote

- Developed and maintained production-grade full-stack applications using **React.js, Node.js, REST APIs, and Meta Graph API**, delivering scalable features and backend integrations.
- Redesigned AWS cloud infrastructure by optimizing **EC2, ECS, VPC, NAT Gateways, and VPC Endpoints**, improving deployment efficiency while reducing infrastructure complexity and operational costs.
- Implemented secure webhook integrations, production deployment workflows, and **GitHub Actions**-based CI/CD pipelines to streamline application releases and improve system reliability.

CollegeXConnect

Founder & Product Lead

Jun 2024 – Present

New Delhi, India

- Founded and scaled an all-in-one student platform serving **3,000+ registered users** and attracting over **250,000+ visitors**, connecting students with internships, jobs, events, and academic resources.
- Architected the complete platform using **Next.js, Node.js, MongoDB, Firebase, REST APIs, and Cloudinary**, owning frontend, backend, authentication, database design, and deployment.
- Built automated content ingestion and moderation workflows, hosting **55+ academic resources** and publishing **100+ verified job opportunities** while reducing manual operations.
- Expanded the platform ecosystem through partnerships with **30+ colleges**, a **2,000+ member student community**, and **3 community collaborations**, driving user growth and engagement.

Tikk18

Web Developer Associate

May 2025 – Aug 2025

Remote / New Delhi, India

- Developed and deployed the official company website using **Next.js, Firebase, Tailwind CSS, Shadcn UI, and Framer Motion**, building responsive and reusable frontend components for a production-ready experience.
- Integrated backend APIs, optimized **Core Web Vitals**, implemented **on-page SEO** best practices, and collaborated with founders to improve website performance, visibility, and overall user experience.

Vital-Vistara (ASM Cognitive)

Web Developer Intern

May 2024 – Jul 2024

New Delhi, India

- Developed responsive landing pages and internal web tools using **React, Firebase, and Tailwind CSS**, following reusable component architecture and modern frontend development practices.
- Improved navigation flow, responsive layouts, and UI consistency across desktop and mobile devices, enhancing usability and overall user experience.

Salesforce

Jul 2022 – Sep 2022

Web Developer Intern

New Delhi, India

- Developed secure backend workflows using **TLS encryption**, object-level access control, and rule-based authorization mechanisms to support enterprise-grade application security.
- Implemented secure data access logic using the **Salesforce Platform** and JavaScript, contributing to authentication, authorization, and compliance-focused backend processes.

PROJECTS

AI Voice Assistant | Desktop AI Automation Agent | *React, Electron.js, WebSockets, Gemini API* 2025

- Built a desktop AI assistant capable of maintaining conversational memory, routing user requests, and executing controlled local system automation.
- Designed modular AI agent workflows with gated execution, structured action routing, and persistent conversational state management.
- Reduced repetitive user interactions by approximately 65% through conversational memory and intelligent task routing.

CompanyBrain | Enterprise Knowledge Search Platform (RAG) | *React, Vector Search, PDF Parsing* 2025

- Developed a Retrieval-Augmented Generation (RAG) platform enabling conversational semantic search across enterprise documents and PDFs.
- Designed document parsing, chunking, indexing, and vector retrieval pipelines to improve answer relevance and knowledge retrieval.
- Implemented offline vector caching strategy that reduced retrieval latency to approximately 1.3 seconds while minimizing compute cost.

ApplyAI | AI Resume Screening Platform | *Next.js, Gemini API, Resume Parser, Shadcn UI, RBAC* 2024

- Built an AI-powered recruitment assistant for automated resume parsing, semantic candidate ranking, and job-role similarity analysis.
- Developed resume parsing, scoring algorithms, and AI-generated improvement recommendations to reduce manual candidate screening effort.
- Integrated Gemini API for semantic analysis and intelligent resume evaluation workflows.

ACHIEVEMENTS & LEADERSHIP

- Founded and scaled a cross-college student community across GGSIPU, growing it to **10,000+ active members** for academic collaboration, opportunity discovery, and resource sharing.
- Led planning and execution of **5+ large-scale technical and cultural events**, managing partnerships, outreach, sponsorship coordination, and cross-college participation.
- Solved **200+ Data Structures & Algorithms** problems while maintaining a **100-day continuous CodeChef coding streak**, demonstrating consistency and strong problem-solving skills.
- Recognized as a **Google Developer Student Clubs (GDSC) Web Associate** for technical contributions, peer mentoring, and active participation in developer initiatives.
- Awarded **Silver Medal** at the Inter-University Sports Competition, demonstrating discipline, teamwork, and competitive excellence.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, C, Java

Frontend: React, Next.js, Electron.js, Vite, Shadcn UI, Framer Motion, Tailwind CSS

Backend: Node.js, Express.js, FastAPI (Python), REST APIs, Authentication, JWT, API Design, Middleware, WebSockets, Webhooks, RBAC

AI & LLM Tools: Gemini API, OpenAI API, HuggingFace Hub, Vector Search (RAG), Prompt Engineering, Claude Code, AI Agents, LLM Integration, Semantic Search

Databases: MongoDB, Firebase, PostgreSQL, Supabase

Cloud & DevOps: AWS, Vercel, Netlify, Render, Docker, Firebase Hosting, Cloudinary, GitHub Actions, CI/CD

Developer Tools: Git, GitHub, VS Code, GitHub Copilot, Kiro, Cursor, Postman, jsPDF, PDF.js, Fuse.js, Recharts
